Summary

Highly motivated Computer Science and Engineering graduate skilled in Java. Proficient in Java 8 features and writing clean, efficient code with OOP. Seeking a Java Developer role to build scalable solutions and contribute to impactful projects.

Technical Skills

- Programming Languages: Java, Javascript
- Frameworks And Libraries: Basics Of Spring Boot
- Web Technologies: RESTful APIs
- Developer Tools: Git, Github, Postman, IntelliJ
- Other Skills: Data Structures And Algorithms, Responsive Design, Linux

Projects

IRCTC - Ticket Booking App

[link](#)

- Developed a Java-based backend application for railway ticket booking using JSON Jackson for data serialization and bcrypt for secure password hashing. Implemented features including secure user login/sign-up, train search between locations, seat availability display, seat booking, and ticket retrieval.
- Leveraged Java 8 features for efficient data management and seamless functionality.

XQuiz

[link](#)

- XQuiz is a quiz application that allows us to create a Quiz comprising multiple Questions. Each Question will have multiple choices, of which one will be a correct answer.
- This application can display the created Quiz to a user, get their choices for the Quiz, evaluate them, and provide a score.

Experience

AICTE AI-ML Internship, Google, Virtual

Jan 2024 – Mar 2024

- Participated in a comprehensive AI/ML virtual internship program offered by Google through AICTE, gaining a solid foundation in core machine learning concepts. I developed an understanding of key terminologies and methodologies, which broadened my technical skill set beyond web development.

Education

Kakinada Institute Of Engineering And Technology

Feb 2021 – May 2024

- BTech in Computer Science specialized in AI-ML
- GPA: 7.23/10.0

Akhil Junior College

June 2018 – March 2020

- Group: MPC
- GPA: 9.12/10.0
